Art Unit: 2611

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Upon review of the application, claim 31 (added in amendment *a*) is now rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The claim contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The examiner regrets not pointing this out earlier in prosecution.

Claim 31 recites “ *a controller determining an input video format (and) a desired output format ...*”. However, applicant’s controller 31 shown in Figs. 3B and 3C has both input and output signals with respective formats already applied thereto. The controller does not “*determine*” the formats, as text on page 7 of the specification corroborates. Language therein specifies that the controller “*determines an operation which should be conducted ...according to an input format and an output.*” From this direct statement, it is clear that the respective formats are *not* determined by the controller but are already known.

2. Claims 4-9 and 11-30 are allowed.
